Summary

AI Engineer, ServiceNow Consultant, and Full Stack Developer who applies AI tools such as Claude Code to design, build, and ship software faster, with experience in ServiceNow platform configuration, IT Asset Management (ITAM), and ServiceNow-SAP integration. Strong expertise in JavaScript, TypeScript, React, Next.js, Node.js, and Laravel, with hands-on experience in REST API development, PostgreSQL, MySQL, and MongoDB. Skilled in responsive web application development, payment gateway integration, and AI-assisted software development.

Education

Wesleyan University Philippines

Cabanatuan, Nueva Ecija

Bachelor of Science in Information Technology | Aug 2021 - Aug 2025

- Cum Laude

Experience

Indra Philippines

Ortigas Avenue, Pasig City (Hybrid)

ServiceNow Consultant | Jan 2026 - Present

- Participated in client discovery sessions and requirements-gathering activities to gain an understanding of business processes and system requirements
- Supported the integration of ServiceNow and SAP using SAP BTP as middleware
- Assisted in the development and configuration of IT Asset Management (ITAM) modules in ServiceNow
- Participated in unit and integration testing involving ServiceNow and SAP

Leads Agricultural Products Corporation

Binan, Laguna

Full Stack Developer | Jul 2025 - Dec 2025

- Built a modern landing page using Next.js with optimized performance and modern design
- Developed a system using Next.js, TypeScript, and PostgreSQL with PayMongo integration for transaction processing
- Implemented blockchain transparency features using Solana and secure authentication with NextAuth
- Assisted in blockchain backend project utilizing TypeScript, Express, SQL, Solana, and Rust Anchor

Philippine Rice Research Institute (PhilRice)

Muñoz, Nueva Ecija (Onsite)

Software Developer Intern | Feb 2025 - May 2025

- Developed a weather data visualization application that streamlines access to PAGASA's forecast data across 1,619 municipalities
- Optimized data handling of over 16,000 daily weather records (temperature, humidity, wind, rainfall) using MongoDB
- Built an interactive Philippines map with Leaflet.js to visualize municipality-level weather information
- Implemented comprehensive historical data analysis tools with custom date range queries and export functionality
- Developed an admin page with configurable rule-based recommendation system for 10-day forecast data
- Automated data retrieval with cron jobs to synchronize with PAGASA's bi-weekly forecast updates

Freelancer

Remote

Full Stack Developer | Jan 2024 - Feb 2025

- Developed a research repository web application for an educational institution using Next.js
- Implemented authentication systems and integrated PayMongo payment processing for client applications
- Converted client UI/UX designs into fully functional, responsive web applications

Projects

Project E-SIP | Next.js, React, TypeScript, PostgreSQL, NextAuth, Git

- Developed a Google Scholar-like platform for 300+ STE schools featuring real-time collaborative document editing, highlighting, and commenting functionality
- Implemented secure school-based authentication with email verification and teacher approval workflow
- Created a monetization system through PayMongo integration enabling pay-per-view access to premium research papers
- Built comprehensive analytics dashboard with AI-powered insights and real-time messaging via Stream

School Management System | React, Laravel, Inertia, MySQL, Git

- Developed a comprehensive educational platform supporting 6 user roles (HR, Registrar, Treasurer, Program Head, Professor, Student) with tailored dashboards and role-based permissions
- Implemented enrollment management, academic scheduling, grade calculation system with breakdown by quarter and assessment type
- Built integrated financial modules for tuition payment processing, payroll management, and miscellaneous fee tracking
- Created facility management features including classroom allocation, building assignment, and faculty/department organization

Technical Skills

- **Languages:** JavaScript, TypeScript, Python, HTML/CSS
- **Frameworks & Libraries:** Next.js, React, Angular, Vue.js, Nuxt, Laravel, Node.js, Express.js
- **Databases:** PostgreSQL, MySQL, MongoDB
- **Platforms & Integration:** ServiceNow, IT Asset Management (ITAM), REST API
- **Tools & DevOps:** Docker, Git, GitHub
- **AI-Assisted Development:** Claude Code, Generative AI Tools
